(TT/SE)

- Acute respiratory symptoms such as cough, sore throat, runny nose, headache
- Muscle ache or tiredness
- Diarrhoea

If your SpO2 (at rest) stays in the range of 93% to 95% for 24 hours or more, you may be eligible for Home Recovery.

Contact your designated healthcare provider if you are not eligible for Home Recovery.

Note: If you require a medical consultation before your designated healthcare provider is assigned to you, you may seek consultation with a [telemedicine provider](#) at no cost.

I have COVID-19 symptoms. What should I do?

Skip the self-test and consult a general practitioner or nurse. You can find a list of these clinics [here](#).

If you have mild symptoms, you should avoid seeking medical attention.

You can check your symptoms [here](#).

You will receive an SMS, with a link to provide you on what you should do.

Household members of Covid-19-positive individual quarantine order [here](#).

They will also be issued an isolation order for 10 d

Below are some potential scenarios:

Day	Adam	Dylan (Son)
1	COVID-19 positive, Home Recovery starts	Home quarantine starts
2		
3		
4		
5		
6	Optional PCR test (negative)	
7	Discharge	
8		
9		
10		Home quarantine ends
11		
12
